It is claimed for the Erie Canal that it is of greater service now than ever before. At present it carries freight at the astonish ingly low rate of a quarter of a cent per ton per mile, and in the seven months it is open annually it delivers in New York more grain than any of the trunk lines which are operated the entire year. The New York Legislature has already appropriated \$250,000 for improvements which will reduce the cost of transportation 50 per cent.

An exchange says: Ohio got the title 'Buckeye State' from the party of emigrants who landed April 18th, 1788, on the site Marietta. Two of the settlers immedately took their axes each wishing to cut the first tree. Neither of them knew the species of the tree selected. One attacked a beech which being hard wood, the process of felling was slow. The other selected a buckeye, which being soft soon came to the ground. And thus, it is affirmed, Ohio came to be called the "Buckeye State."

If any Democratic reader of this paper has a weak-kneed Republican neighbor who needs a little good literature, send to us for a sample copy or two for him. And Democrats can help the cause this year as they never did before by helping to spread the literature of the party. Send in the names of your neighbors who do not take the paper. Give us every chance possible to spread the gospel among the people. You can easily get us a club of five readers in your vicinity for the campaign. It can be done with but little effort and it might do much good in the fight.

Under the administration of President Arthur, during the sixteen months preceding March 4, 1885, the Republican party paid off \$116,297,000 of the public debt. The present Democratic administration has been in power just sixteen months, and it has barely succeeded in paying off \$50,148,-900 of the debt or less than one-half as much as the Republican party paid off in an equal

time.—Deflance Express. For willful lying the above takes the cake, The truth is that during the sixteen months of Democratic rule the national debt has been decreased in the neighborhood of \$200,000,000, and the decrease for the fiscal year ending June 30th, 1886, was over \$96,-000,000! Also, the expenditures have been lecreased over \$18,000,000, and this too in the face of an unusually large payment for pensions made during the year, aggregating Tennessee show a Democratic plurality of press are intelligent and its editor will gain

Speech of Congressman Seney. We direct the attention of our readers to the speech of Hon. Geo. E. Seney, which we print in this impression. It is couched in plain language which none can fail to under stand, and contains facts which are forci ble in their convictions. Containg these two essential points we hasten to give it to our readers, as one of the best speeches made in the present Congress.

Our Bill for Luxuries.

Spirits, wine and beer certainly come un der the head of luxuries, but the tobacco habit has become so ingrined in the American sovereign, his use of the weed may be accepted almost as much a necessity as his use of sugar, tea or coffee.

The dry figures of the Internal Revenu report, just one of the year ending June 30, yield much curious information of the extent of the drinking and tobacco habits of the American people. The consumption of beer is increasing, and for the past year amounted to 642,000,000 gallons, or nearly eleven gallons for every inhabitant, babies included.

The consumption of whisky was over 70. 000,000 gallons, or about five quarts per capita. There is a falling off here, as fifteen years ago the consumption was nearly two gallons per head. This is attributed to the increase consumption of beer and the spread of prohibition at the South.

The increase in the consumption of tobacco is remarkable. It amounted during the year cline. Prior to 1870 the quantity of tobacco consumed was from one to two pounds per head. In 1882 it passed three pounds and has been above that floure ever since. There were about sixty cigars per head used during the year; but this is included in the pound

"It remains to add," says the statistician who has gone into this subject at length, "that supposing eigarettes 20 cents a package, tobacco \$1 per pound in retail forms, peer 5 cents a glass, and spirits 5 cents for half a gill, prices which are certainly not as high as those paid by most consumers, the cost of these articles to the people of this country is over \$1,189,000,000, or \$19.82 for every inhabitant. This burden is borne by about 20,000,000 wage-earners, however, and for them it averages \$59 yearly. All the money that trades unions have added or ever will add to the wages of labor will not equal half the sum spent last year, mainly by working people, in the consumption of liquor alone, which cost them much over \$800,000,-

The boy or girl who is a regular newspaper reader will grow up into intelligence, and will use good language, both in speaking and writing, even with a limited education. It is news, science, literature, grammar, history, geography and spelling combined .-Sometimes it is a little difficult to get the children interested in newspapers, but after they once get started their intellectual cravngs are as sure as the desire for food, and it s as necessary to feed their minds as their bodies. The local paper is the first to attract their attention. Incidentally they first read of some local events which came under their observation. Becoming regular readers of the home paper, they soon branch out into the affairs of the world, and read the general news of the day, and finally become competent to discuss matters of public interest, and are useful and intelligent citizens.

13 Shooting out of season-often when birds are breeding-raking them on the ground, and using gill nets, seins or dynamite for the capture of fish, makes our once plentiful game scarce. It is not the true sportsman who creates the havoc, but illegal practices. The true sportsman takes his rod or gun, goes in season, when breeding or spawning is over, shoots his birds on the wing, and by so doing always leaves enough birds to duplicate the brood next season; or with light, suple rod kills the grown fish, and even those have a good chance for liberty, as the tackle is such that skill is required to capture the fish. He makes a respectable bag and goes home satisfied. The law breaker, pot hunter and market hunter goes out with his nets, dynamite or gun, shoots birds on the ground, killing, very often the entire brood; or, with family. murderous dynamite and nets captures and kills large and small fish, picking out such as are wanted and leaving the thousands of home they were accompanied by John Robsmall fry, that would develop into fine fish, erts and Miss Martha Roberts. to decay on the banks of the streams. The pensions made during the year, aggregating nearly \$65,000,000! The readers of the Extra enforcement of the game laws should have the hearty support of every person who depress are intelligent and its editor will gain nothing by his lying.
